Ecobait[™] IP | READ LABEL COMPLETELY BEFORE USING

This product MUST NOT be used for any purpose or in any manner contrary to the controls and conditions of registration.

HAZARD CLASSIFICATION:

GH5 Classification: Designed for biocidal action. Take all reasonable steps to ensure that the substance does not cause any significant adverse effects to the environment beyond the application area.

PRECAUTIONS

Keep out of reach of children. Wash hands after use.

STORAGE

Store in the closed original container in a cool, well ventilated area, out of direct sunlight.

DISPOSAL

Dispose of this product by using in accordance with this label. Dispose of packaging to a suitable landfill.

FIRST AID

If poisoning occurs, contact a doctor or the National Poisons Centre. Phone 0800 764 766.

ANIMAL SAFETY

Low risk to pets and wildlife. If your pet eats ECOBAIT IP, contact your veterinary surgeon immediately, as the consumption of large quantities may be toxic. The active ingredient in this product is Iron Phosphate.

EMERGENCY RESPONSE

In transport emergency call 111, Police or Fire Brigade. For 24hr specialist advice in an emergency only call **0800 CHEMCALL (0800 243 622)**.

SAFETY DATA SHEET

If additional safety information is required, refer to the Safety Data Sheet. For a copy contact the customer centre on 0800 100 123.

TRANSPORT

Do not carry this product on a passenger service vehicle.

SHELF LIFE

When stored appropriately this product should show no significant degradation for two years from the date of manufacture. Contact your supplier for further information about the use of any product that is older than this.

GENERAL INFORMATION

ECOBAIT IP is a unique product containing iron phosphate, which is a natural component of soil, in a specially formulated bait. Any uneaten bait will degrade and become part of the soil.

After ingesting this bait (even in small amounts), snails and slugs cease feeding, which provides immediate protection to plants. Dead snails and slugs may not be visible as they often crawl away to secluded places to die. Plant protection will be observed in the dramatic decrease in plant damage.

Where the pest pressure is heavy, it may be necessary to repeat the application. Best results are achieved by application during mild damp weather when snails and slugs are most active. Snails need to be active to come into contact with the bait.

Scatter baits evenly using an appropriate applicator. DO NOT place in heaps. Clean up any spilled baits, including after filling applicator.

TIMING

Apply baits when crops are most vulnerable and when the pest is evident and active. For broadacre crops, start when rain/moisture triggers snail and slug activity in autumn or spring.

Best results may be achieved by applying just before or at crop emergence where crops are being sown. For transplants apply at time of transplanting. See your distributor for further advice.

DIRECTIONS FOR USE:

| Crop/Situation | Pest | Rate | Critical Comments |
|---|------------------|-----------|---|
| Agricultural crops Including cereals, oilseeds, pulses, pastures (established and seedling), crop boundaries, bare ground (including broadacre pre-emergent, pasture pre-establishment) | Snails and slugs | 5-7 kg/ha | Broadcast evenly over the surface of the ground where snails and slugs are active. For most infestations, use the lower rate. For moderate to high infestations, use a higher rate. Re-apply every 10-14 days or when pellets have disappeared. |
| Horticultural crops Including Fruit (including grapevines), Citrus orchards, Vegetable and Berry crops, Ornamentals | | | When applying to crops, ensure pellets do not become lodged in plant foliage. |
| Other Public authority and industrial areas, Roadsides, Turf and other situations where snails and slugs congregate | | | |

This substance must be applied by ground-based methods only. The maximum application rate for this substance is 0.21 kg iron (III) phosphate (hydrated)/ha (equivalent to 7 kg Ecobait IP/ha).

WITHHOLDING PERIOD

It is an offence for users of this product to cause residues exceeding the relevant MRL in the Food Notice: Maximum Residue Levels for Agricultural Compounds.

All Edible Crops: Do not harvest for 1 day after application.

EXCLUSION OF LIABILITY: PLEASE READ

To the extent permitted by law, buyers and/or users of the goods accept that neither the manufacturer, AGRISOURCE as distributor, nor any other distributor have any liability or responsibility whatsoever for any loss, damage or injury whether in contract or tort, whether direct, indirect or consequential howsoever arising in connection with the supply of these goods.
